EMPOWERING MUNICIPALITIES
WITH CLOUD-BASED FINANCIAL SOFTWARE.

Accounting. Collections. In the Cloud.

Municipalities across Pennsylvania have been tasked to do more, with less. And the new Stormwater Fee brings a number of further challenges to the municipal landscape.

For over 25 years, VADAR® Systems has been providing municipalities with cloud-based financial software applications that maximize operational efficiency. We have a deep and rich history working with state and local governments, spanning 150 clients in 9 states. Since 2012, VADAR has proudly served the Pennsylvania marketplace with several financial software suites, including Earned Income Tax, Sewage Billing, Trash Billing—and now the new Stormwater Billing application.

FULL-SERVICE SOLUTIONS FOR MANAGING THE NEW STORMWATER FEE. AND MORE.

VADAR®
SYSTEMS
EST. 1996

BUILT BY PENNSYLVANIA
FOR PENNSYLVANIA.

VADAR® worked with Pennsylvania collection officials to create our Pennsylvania Billing Suite, applications specifically tailored to the way Pennsylvania bills and collects sewage, trash and stormwater fees. Our software solutions will help you boost time and cost-efficiencies, allowing you to better serve your constituents. Municipalities will benefit from:

- **Our Sewage Application** is configurable to support either West View or Pennsylvania American Water Company billing imports; also allows for a myriad of flexible billing methods, either for rate-based or usage-based calculations

- **User interfaces** are designed to quote balances, answer payment questions, billing inquiries, customer account commenting, and payment plans

- **Stormwater and Trash Billing Suites** have been developed to flexibly allow for rate-based calculations, such as discounted senior rates, curb rates, per bag/barrel rates for Trash Billing; and simple rate structures, or true impervious surface area unit-based handling for Stormwater fees

- **Billing periods** are configurable for either annual, quarterly, or monthly collection

- **Payment methods** for annual billers allow customer options for early payment discounts, late payment penalties, or automated installments to split and separately invoice liabilities

- **All applications support flexible interest calculation rates** as well as payment imports (lockbox or online payment vendors) and invoice exports for external vendor printing

WE KNOW PENNSYLVANIA.

- VADAR's Pennsylvania Earned Income Tax Platform has **tracked more than $450 Billion in wages and processed more than $7 Billion in PA income tax withholdings**

- VADAR's Pennsylvania Sewage, Trash and Stormwater applications support more than 30 Pennsylvania municipalities and **manage more than 180,000+ individual customer accounts**

- Sewage, Trash and Stormwater Suites have billed and collected **more than $550 Million dollars in sewage, trash, and stormwater fees**

FROM FIELD TO COMPLIANCE TO BILLING & COLLECTIONS.

VADAR partners with NRBY—an intelligent mobile work service platform to replace pen, paper, and manual processes with electronic data collection and image storage for compliance audits. Together, we digitally transform stormwater and utility management to drive efficiency and improve communication.
